INNOVARE LEARNING CENTER TRAINING CALENDAR 2024

Innovare Learning Centre Innovare is a management consulting and training firm. We train and implement global best practices and standards. We execute a unique business model of building long lasting relationships, based on strong values and understanding of client's needs. Coupled with highly trained, certified and vastly experienced consultants and facilitators we have established a reputation of professionalism in providing top notch training services.

Our Resource Persons are active practitioners who either consult for or work in business environments where they use the very technologies and skills they teach. On average, our instructors are equipped to share their real-world experience and practical solutions with you. Everything you learn is practical, relevant and up to the minute.

Post Training Support - The learning does not end when the course ends. Our post-course support makes the instructor available to you by email and telephone or into your workplace to help your team apply what they've learned. Ensuring your post-course success starts with the end-of-course evaluation. These evaluations are a critical tool to maintain in maintaining the quality of the service we are delivering. Our consultants will work with you to make sure your goals were met. We can combine evaluation results with our post–course analysis to give you a comprehensive skills inventory.

Innovare is ISO 27001 Certified.
